### **DETAILED ACTION**

Applicant's preliminary amendment filed / 11/17/2003 is acknowledged

Claims 1-3 have cancelled. Claims 4-6 are added and are pending.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 4, drawn to a method for determining whether a composition modulated Pin1 activity, classified in class 435, subclass 4.
- II. Claim 5 in part, drawn to a method for treating a cell proliferative disorder in a subject, comprising administering an amount of Pin1 to induce mitotic arrest and nuclear fragmentation, classified in class 424, subclass 184.1.
- III. Claim 5 in part, drawn to a method for treating a cell proliferative disorder in a subject, comprising administering an amount of PIN1 inhibitor to induce mitotic arrest and nuclear fragmentation, classified in class 424, subclass 178.1 and 184.1.
- IV. Claim 6, drawn to a method for treating a cell proliferative disorder in a subject, comprising administering an amount of PIN1 enhancer to block the cell in G2, classified in class 424, subclass 184.1.

Inventions are distinct each from the other because of the following reasons:

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to method using different active ingredients that have different functions. Pin1, PIN1 inhibitor, and PIN1 enhance are different molecules, which do not share common structure and have different biological functions. Search of these different molecules are not co-extensive in text searching in non-patent literature and US patent database.

Art Unit: 1642

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitation of the allowable product claim will be rejoined in accordance with the provisions of M.P.E.P. 821.04. Process claims that depend from or otherwise include all the limitation of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after allowance are governed by 37 C.F.R. 1.312.

In the event of a rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 C.F.R. 1.104. thus, to be allowable, the rejoined claims must meet the criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. 103(b), 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that process claims should be amended during prosecution either to maintain dependency on the product claims or otherwise include the limitation of the product claims. Failure to do so may result in a loss of the right to rejoinder.

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See M.P.E.P. 804.01.
